

Lexi's idea

We really liked the idea of the swing. We'd like to know how tightly it holds the spice.

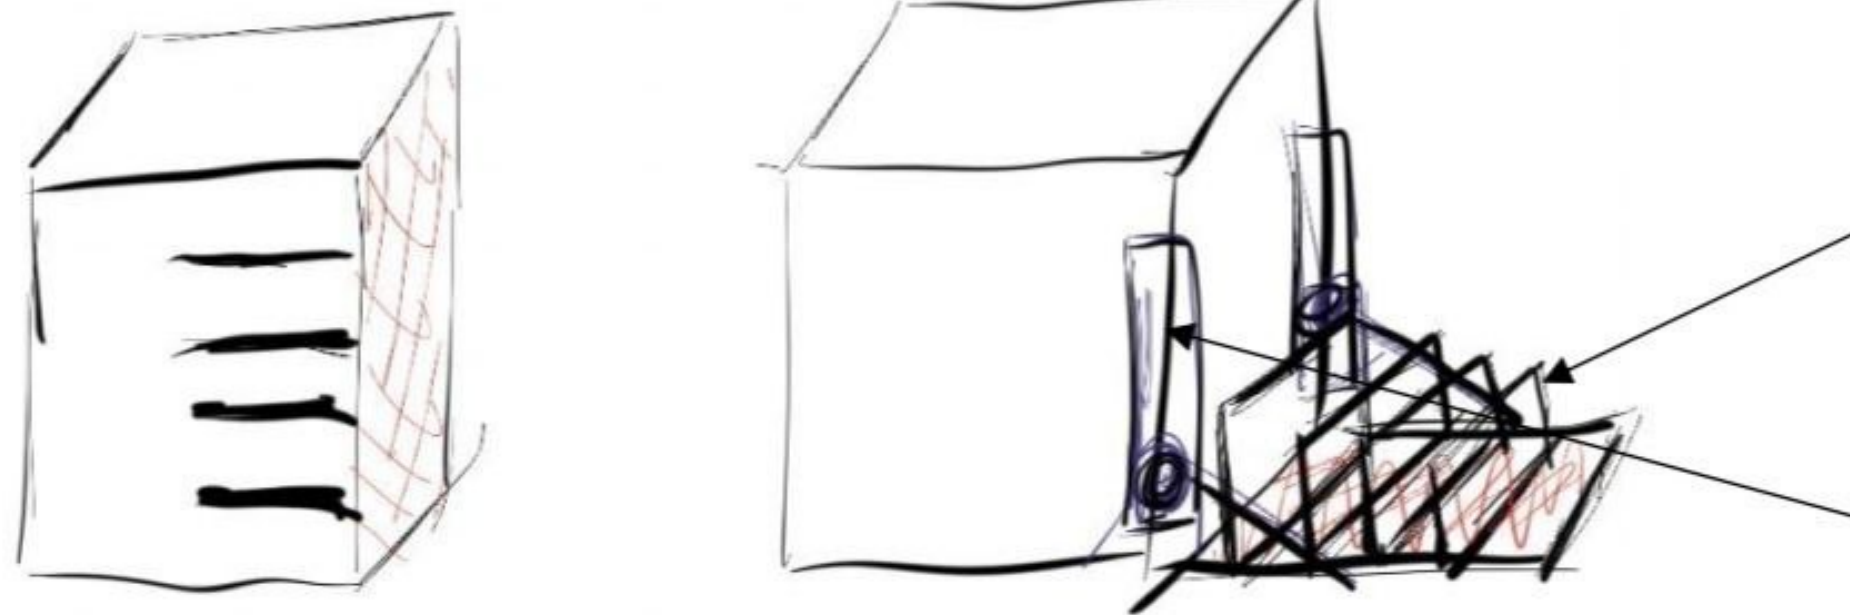

And we also would like there to be several rows with such clamps.

Liu Cong's idea

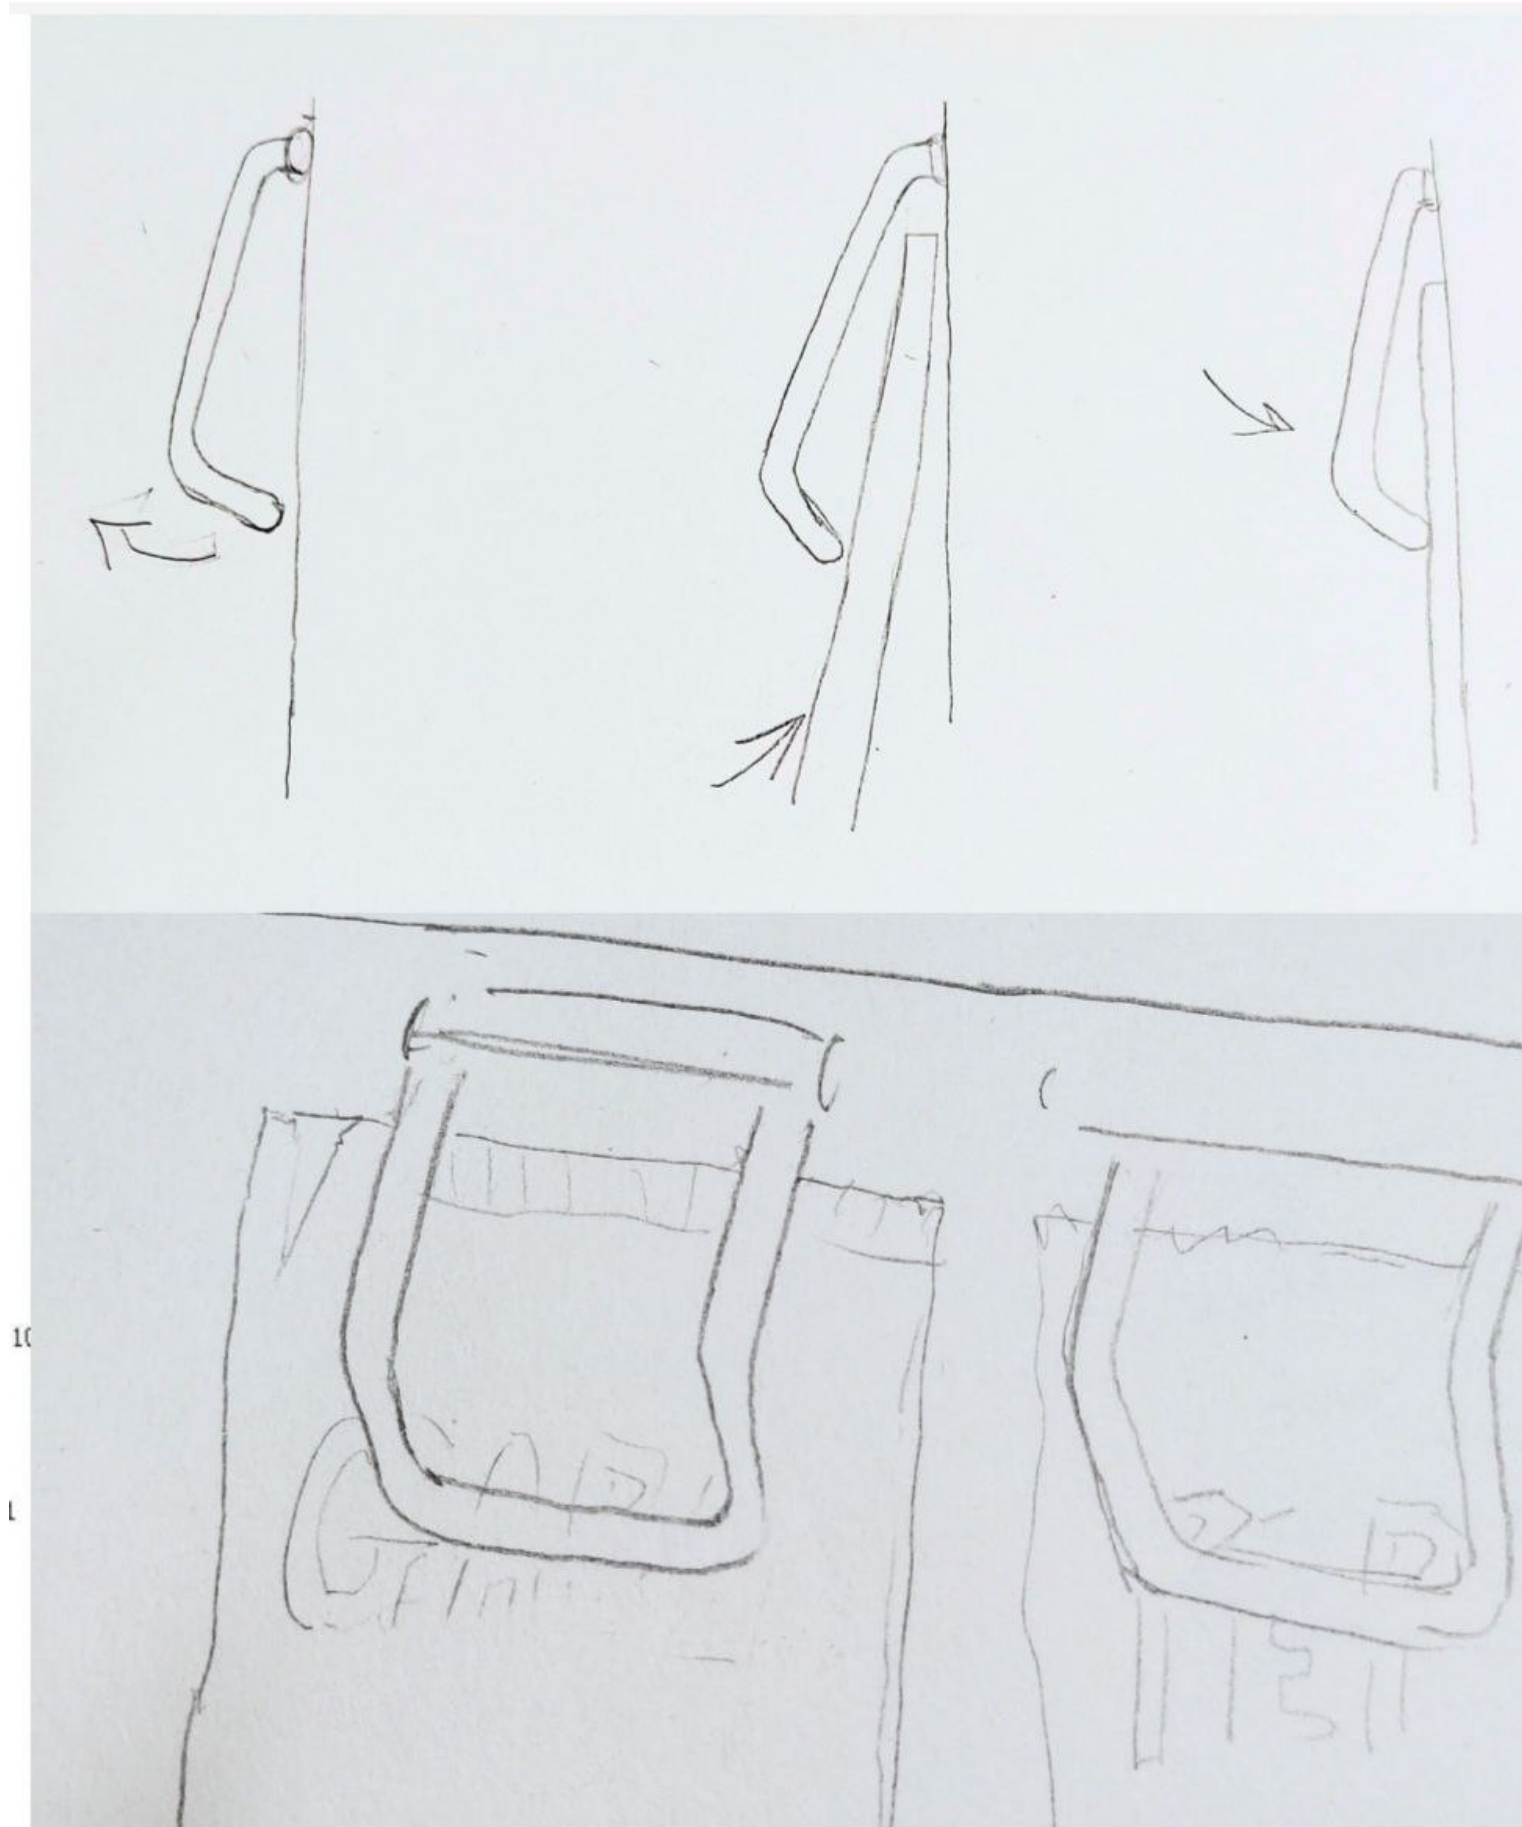

We also liked this idea, especially option 1 and 2. But it is not clear how these shelves will work in the first option.

Do these shelves work like in the picture? So that when we close the door of the box, all the spices do not fall, but remain in their place.

Conclusion

In the end we would like to combine Lexi's idea and Liu Cong's idea

+
