FIRST STEP!

LET'S MEET ARAS, YAGMUR AND BASAK!

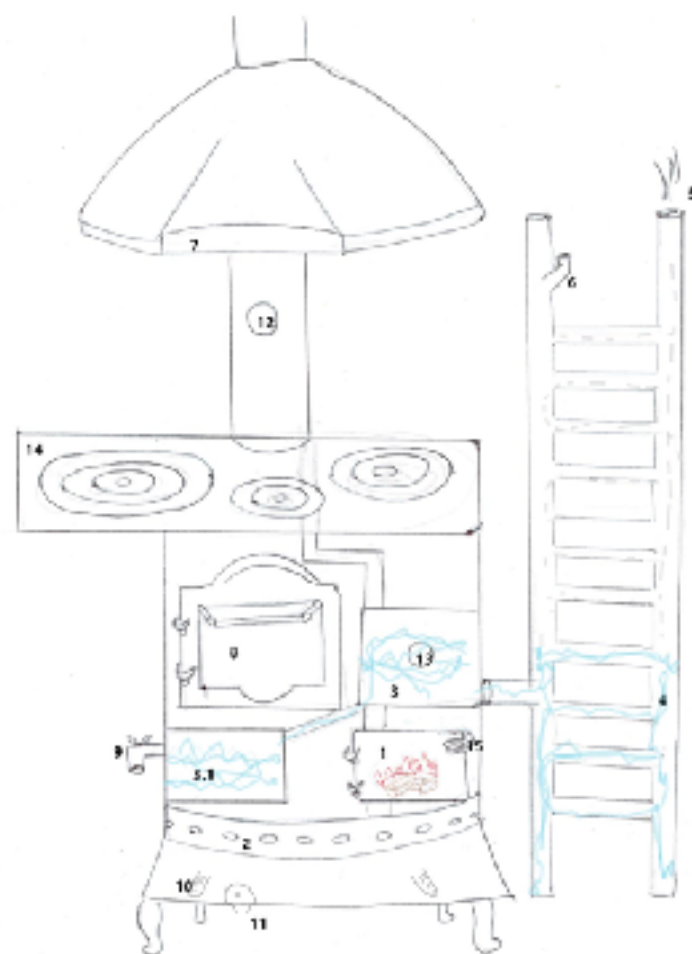

Thanks to the creation of a WhatsApp group, a Discord group and our social networks we managed to get to know each other and stay in touch with the team10 to create not only a working but also a personal bond. Since we think that by creating a "family" working environment we would be able to work in the best way on both sides, both as clients and as designers

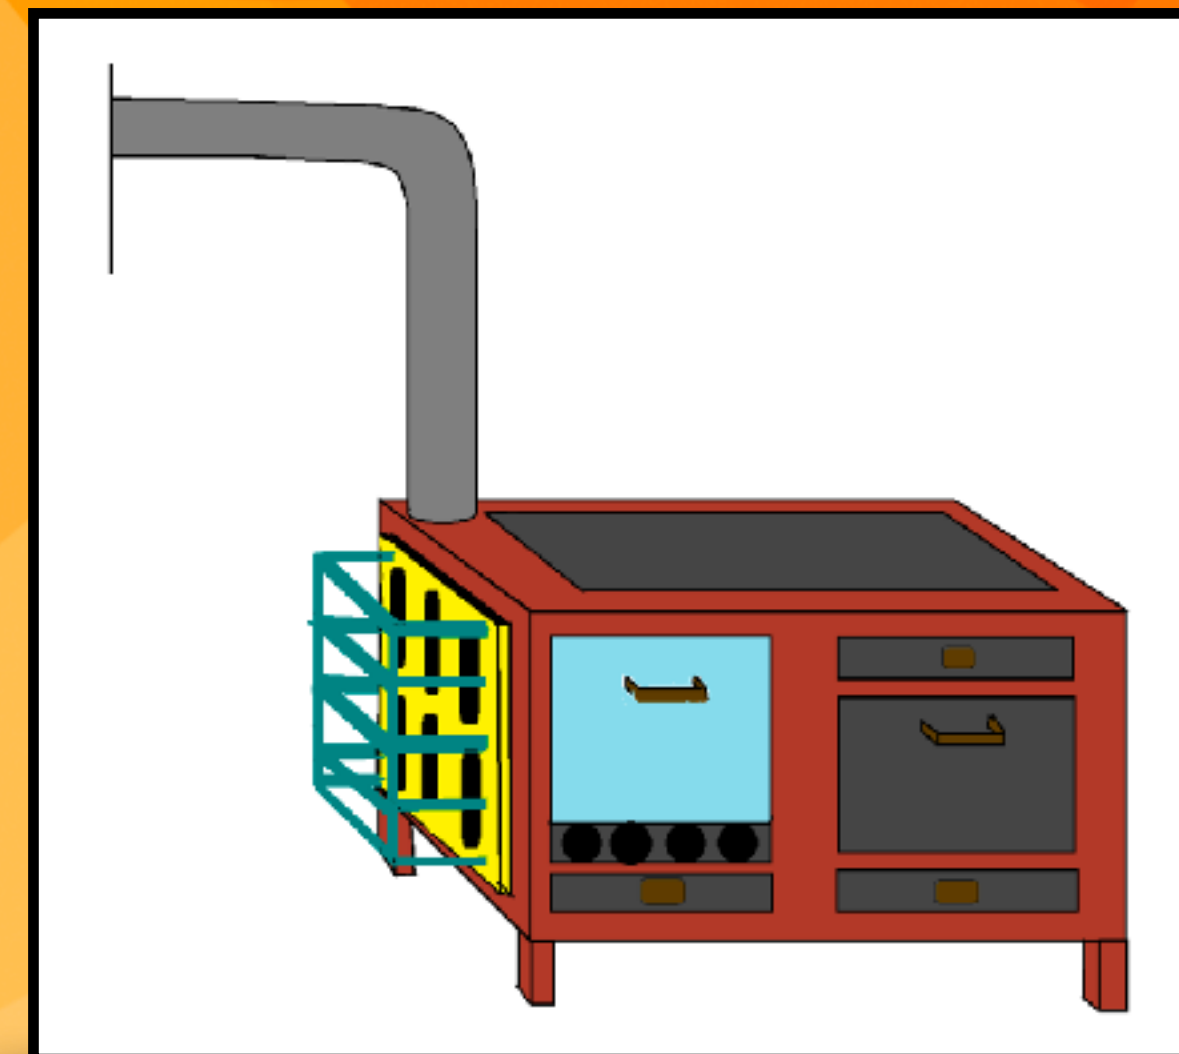

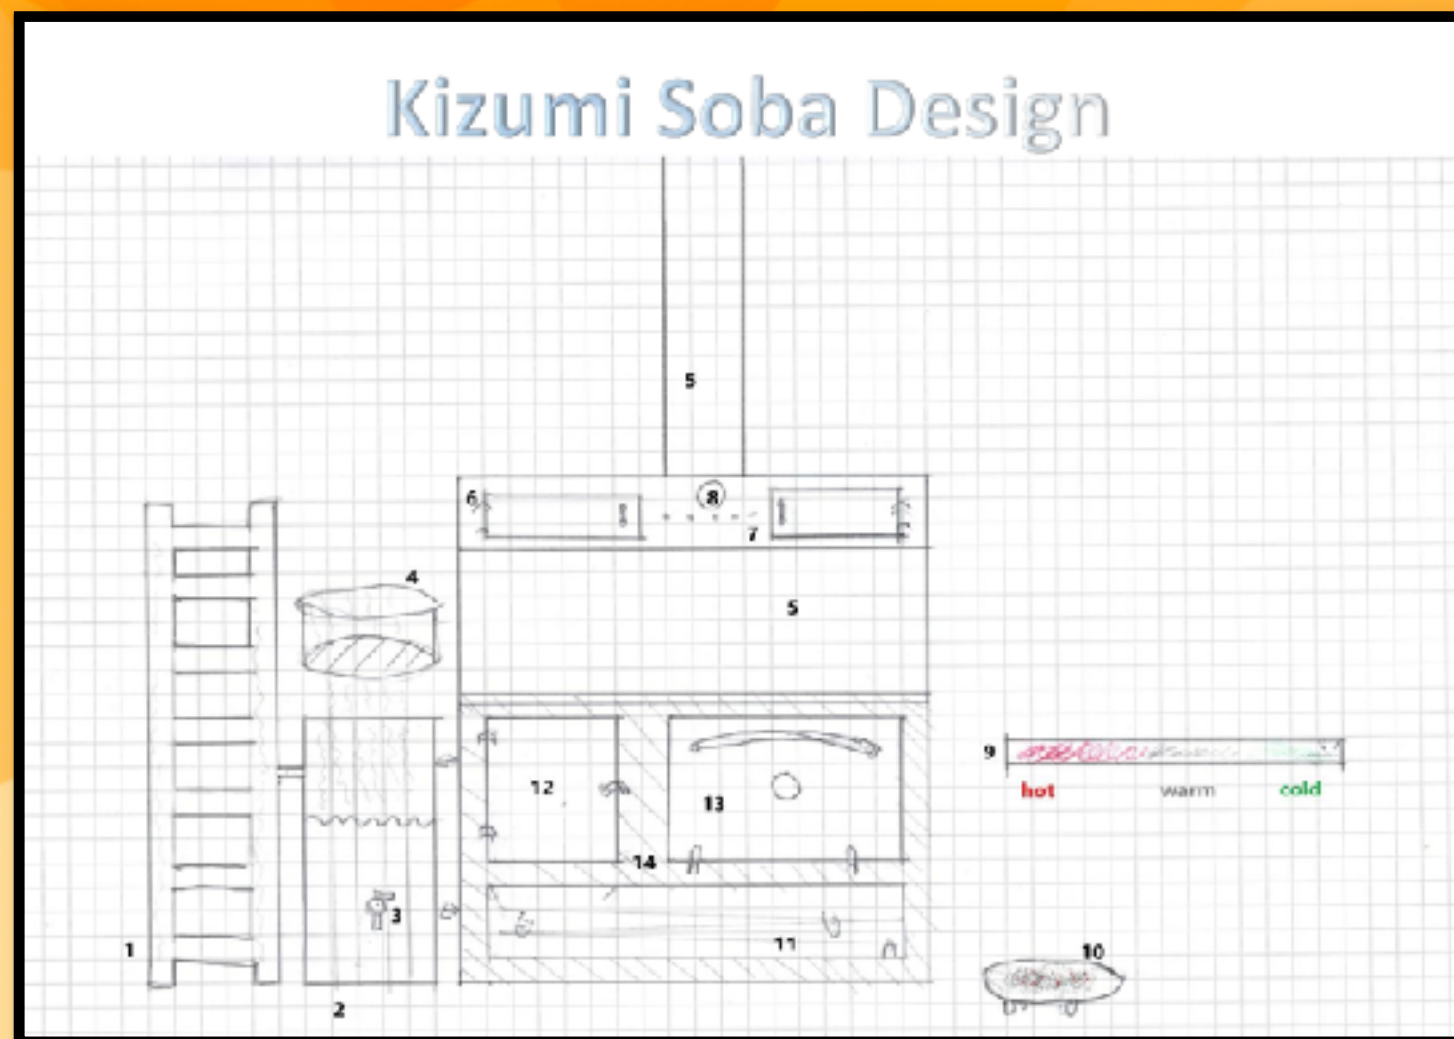

LET'S START WORKING!

After receiving and sending the briefs, we started to think about possible design ideas to solve the team 10 brief... Deciding to tackle the proposed problems by first trying to create modular systems to combine with the original Turkish soba and then also focusing on on possible ideas for a total modernization of the original concept of soba itself. We have adopted this strategy both to propose something new (in the case of modernization) and to show respect for the Turkish tradition and the history of soba (in the case of modular systems)

LET'S START WORKING!

Meanwhile, while we developed our designs for their brief, our colleagues on team 10 did the same. Sending us innovative ideas that fueled our curiosity. In order to evaluate them in the best possible way, we decided to create an evaluation grid with the criteria that we considered most important so as to help them even more in understanding our requests and focusing on the most important points for us.

SECOND MEETING

LET'S DISCUSS THE BRIEFS

During our group meeting on 19/11/2023, we achieved an extraordinary level of productivity. The synergy among team members was palpable, to the point that it felt like we had been working together for years. Each of us made significant contributions, articulating the virtues and critical points of every proposed idea. This open and constructive dialogue allowed us to take significant strides towards the creation of the final artifact for our project. The overall feeling is one of strong teamwork and great cohesion. It's gratifying to see how our ideas are seamlessly coming together, paving the way for a final result that promises to be exceptional. Working together in this positive atmosphere is truly a rewarding experience.
